Art Unit: 2837

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 87 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what device in line 7 is connected to? Is it same as device in line 2 or different? . Is second radio coupled to the same robot in line 2 or different?

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 77-86 and as best can be understood claims 87-91 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohya et al in view of Reeley and Hayward et al as cited by applicant.

Ohya et al discloses safety at robot competition, commencing robot competition and providing remote disabling mechanism to disable at least one robot independent of person operating robot, see col 2 lines 45-65 and col 3 lines 5-55. Ohya et al lacks vicinity being 500 ft and plural robots. Reeley discloses 500 feet, see col 10 lines 63. Hayward et al discloses plural robots, see abstract. It would have been obvious to one of ordinary skill in the art to combine the safety at robot competition of Ohya et al with 500 ft of Reeley for controlling motion and combine the plural robots for mobility and navigation.

Art Unit: 2837

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Scott discloses robots and 500 feet .
